

PG&E Corporation[®]

FIRST QUARTER EARNINGS CALL

May 2, 2017

Forward Looking Statements

This slide presentation contains forecasts and estimates of PG&E Corporation's 2017 financial results, 2017 items impacting comparability, 2017 equity issuance, 2017-2019 capital expenditures and rate base growth, dividend policy, and general earnings sensitivities. These forecasts and estimates are based on 2017 assumptions, including but not limited to those relating to capital expenditures, authorized rate base and rate base growth assumptions, authorized cost of capital, and certain other factors, which constitute forward-looking statements that are necessarily subject to various risks and uncertainties and actual results may differ materially. PG&E Corporation and the Utility are not able to predict all the factors that may affect future results. Factors that could cause actual results to differ materially include, but are not limited to:

- the timing and outcomes of the 2017 GRC, the TO rate case, the cost of capital proceeding, and other ratemaking and regulatory proceedings;
- the timing and outcome of the Butte fire litigation, and whether the Utility's insurance is sufficient to cover the Utility's liability resulting therefrom or whether insurance is otherwise available; the effect, if any, the SED's \$8.3 million citations issued in connection with the Butte fire may have on such litigation; and whether additional investigations and proceedings in connection with the Butte fire will be opened and any additional fines or penalties imposed on the Utility;
- the outcome of the probation and the monitorship, the timing and outcomes of the debarment proceeding, the SED's unresolved enforcement matters relating to the Utility's compliance with natural gas-related laws and regulations, and other investigations that have been or may be commenced, and the ultimate amount of fines, penalties, and remedial and other costs that the Utility may incur as a result;
- the timing and outcomes of (i) the CPUC's decision in connection with its investigation of the Utility's compliance with its ex parte communication rules and the settlement agreement entered into by the Utility and certain parties, and (ii) the U.S. Attorney's Office in San Francisco and the California Attorney General's office investigations in connection with communications between the Utility's personnel and CPUC officials;
- the outcomes of current and future self-reports, investigations or other enforcement proceedings that could be commenced or notices of violation that could be issued relating to the Utility's compliance with laws, rules, regulations, or orders applicable to its operations;
- the Utility's ability to control its costs within the authorized levels of spending and the extent to which the Utility incurs unrecoverable costs that are higher than the forecasts of such costs;
- the impact of the increasing cost of natural gas regulations;
- changes in cost forecasts or the scope and timing of planned work resulting from changes in customer demand for electricity and natural gas or other reasons;
- the impact that reductions in customer demand for electricity and natural gas have on the Utility's ability to make and recover its investments through rates and earn its authorized return on equity, and whether the Utility is successful in addressing the impact of growing distributed and renewable generation resources, changing customer demand for natural gas and electric services, and an increasing number of customers departing for community choice aggregators;
- whether, as a result of Westinghouse Electric Company LLC's Chapter 11 proceeding, the Utility will experience issues with nuclear fuel supply, nuclear fuel inventory, and related services and products that Westinghouse supplies, and whether such proceeding will affect the Utility's contracts with Westinghouse;
- whether the Utility can continue to obtain insurance and whether insurance coverage is adequate for future losses or claims, especially following a major event that causes widespread third-party losses;
- the ability of PG&E Corporation and the Utility to access capital markets and other sources of debt and equity financing in a timely manner on acceptable terms, and the amount and timing of additional common stock and debt issuances by PG&E Corporation;
- changes in estimated environmental remediation costs, including costs associated with the Utility's natural gas compressor sites;
- the outcome of federal or state tax audits and the impact of any changes in federal or state tax laws, policies, regulations, or their interpretation, including as a result of the recent changes in the federal government;
- the impact of changes in GAAP, standards, rules, or policies, including those related to regulatory accounting, and the impact of changes in their interpretation or application; and
- the other factors disclosed in PG&E Corporation and the Utility's joint annual report on Form 10-K for the year ended December 31, 2016, their joint quarterly report on Form 10-Q for the quarter ended March 31, 2017, and other reports filed with the Securities and Exchange Commission (SEC).

This presentation is not complete without the accompanying statements made by management during the webcast conference call held on May 2, 2017. The statements in this presentation are made as of May 2, 2017. PG&E Corporation undertakes no obligation to update information contained herein. This presentation, including Appendices, and the accompanying press release were attached to PG&E Corporation's Current Report on Form 8-K that was furnished to the SEC on May 2, 2017 and, along with the replay of the conference call, is also available on PG&E Corporation's website at www.pgecorp.com.

Well-positioned to Deliver Strong Returns

Building on Safety and Operational Performance

- Continuing focus on public, employee, and contractor safety
- Delivering reliable gas and electric service

Delivering on Customer Expectations

- Improving customer service through continuous innovation
- Focusing on maintaining affordable service

Positioning PG&E for Success

- Enabling California's clean energy economy
- Building coalitions

Healthy 3-year growth profile

- ~6.5-7% ratebase growth
- Above average dividend growth

Base Case Assumptions:

- 2017 General Rate Case settlement through 2019
- 2015 Gas Transmission & Storage rate case
 - Phase 2 decision through 2018; flat in 2019
 - ~\$400M for 2011-2014 spend subject to audit added in 2018
- Transmission Owner rate case:
 - High end: TO18 filing held flat through 2019
 - Low end: TO17 settlement held flat through 2019
- Electric Vehicle Infrastructure decision in December 2016

Potential Future Updates:

- 2019 Gas Transmission & Storage rate case
- 2018 and 2019 Transmission Owner rate cases
- Future competitive transmission opportunities
- State infrastructure modernization (e.g., rail and water projects)
- Future storage opportunities
- Future transportation electrification (e.g., January 2017 medium and heavy duty vehicle filing)
- [New gas storage regulations](#)

All amounts presented in the table above are tax adjusted at PG&E Corporation's statutory tax rate of 40.75 percent except for fines, which are not tax deductible. See Footnote 4 below.

- (1) "Items impacting comparability" represent items that management does not consider part of the normal course of operations and affect comparability of financial results between periods. See Exhibit G: Use of Non-GAAP Financial Measures.
- (2) The Utility incurred costs of \$28 million (before the tax impact of \$12 million) during the three months ended March 31, 2017, for pipeline related expenses incurred in connection with the multi-year effort to identify and remove encroachments from transmission pipeline rights-of-way.
- (3) The Utility incurred costs of \$4 million (before the tax impact of \$2 million) during the three months ended March 31, 2017, for legal and regulatory related expenses incurred in connection with various enforcement, regulatory, and litigation activities regarding natural gas matters and regulatory communications.
- (4) The Utility incurred costs of \$60 million (before the tax impact of \$24 million) during the three months ended March 31, 2017, for fines and penalties. This includes costs of \$32 million (before the tax impact of \$13 million) during the three months ended March 31, 2017, associated with safety-related cost disallowances imposed by the California Public Utilities Commission ("CPUC") in its April 9, 2015 decision ("San Bruno Penalty Decision") in the gas transmission pipeline investigations. The Utility also recorded \$15 million (before the tax impact of \$6 million) during the three months ended March 31, 2017, for disallowances imposed by the CPUC in its final phase two decision of the 2015 Gas Transmission and Storage ("GT&S") rate case for prohibited ex parte communications. In addition, the Utility accrued financial remedies of \$12 million (before the tax impact of \$5 million) and \$1 million (which is not tax deductible) during the three months ended March 31, 2017, in connection with the settlement filed with the CPUC on March 28, 2017, related to the *Order Instituting an Investigation into Compliance with Ex Parte Communication Rules*.

Future fines or penalties may be imposed in connection with other enforcement, regulatory, and litigation activities regarding natural gas matters and regulatory communications.

- (5) The Utility recorded costs of \$3 million (before the tax impact of \$1 million) during the three months ended March 31, 2017, associated with the Butte fire, net of insurance. This includes charges of \$10 million (before the tax impact of \$4 million) during the three months ended March 31, 2017, for legal costs associated with the Butte fire, partially offset by \$7 million (before the tax impact of \$3 million) recorded during the three months ended March 31, 2017, for expected insurance recovery.

Butte fire related costs, net of insurance	\$	3

- (6) As a result of the CPUC's final phase two decision in the 2015 GT&S rate case, during the three months ended March 31, 2017, the Utility recorded revenues of \$150 million (before the tax impact of \$62 million) in excess of the 2017 authorized revenue requirement, which includes the final component of under-collected revenues retroactive to January 1, 2015.
- (7) "Earnings from operations" is a non-GAAP financial measure. See Exhibit G: Use of Non-GAAP Financial Measures.

Exhibit B: Key Drivers of PG&E Corporation's Earnings per Common Share ("EPS") from Operations

First Quarter, 2017 vs. 2016
(\$/Share, Diluted)

First Quarter 2016 EPS from Operations ⁽¹⁾	\$	0.82
Timing of 2015 GT&S revenue impact ⁽²⁾		0.15

Timing of 2017 GRC decision ⁽⁴⁾		(0.03)
Increase in shares outstanding		(0.02)
First Quarter 2017 EPS from Operations ⁽¹⁾	\$	<u>1.06</u>

- (1) See Exhibit A for a reconciliation of EPS on a GAAP basis to EPS from Operations. All amounts presented in the table above are tax adjusted at PG&E Corporation's statutory tax rate of 40.75 percent.
- (2) Represents the impact in 2016 of the delay in the Utility's 2015 GT&S rate case. The CPUC issued its final phase two decision on December 1, 2016, delaying recognition of the full 2016 revenue increase until the fourth quarter of 2016.
- (3) Represents the incremental tax benefit related to share-based compensation awards that vested during the three months ended March 31, 2017. Pursuant to ASU 2016-09, which PG&E Corporation and the Utility adopted in 2016, excess tax benefits associated with vested awards are reflected in net income.
- (4) Represents the increase in GRC-related capital costs (depreciation and interest) but does not include an offsetting revenue increase, which is pending a final decision in the Utility's 2017 GRC proceeding.

See following page for definitions of the operational performance metrics. The operational performance goals set under the PG&E Corporation 2017 Short Term Incentive Plan (“STIP”) are based on the same operational metrics and targets.

(1) The 2017 target for earnings from operations is not publicly reported but is consistent with the guidance range provided for 2017 EPS from operations of \$3.55 to \$3.75.

Safety

Public and employee safety are measured in four areas: (1) Nuclear Operations Safety, (2) Electric Operations Safety, (3) Gas Operations Safety, and (4) Employee Safety.

1. The safety of the Utility's nuclear power operations, Unit 1 and Unit 2, is an index comprised of 11 performance indicators for nuclear power generation that are regularly benchmarked against other nuclear power generators.
2. The safety of the Utility's electric operations is represented by (a) work that supports the safe reliable operations of the overhead electric system, and (b) the percentage of time that Utility personnel are on site within 60 minutes after receiving a 911 call of a potential Utility electric hazard.
3. The safety of the Utility's natural gas operations is represented by (a) the ability to complete planned in-line inspections and pipeline retrofit projects, measured by two equally weighted components of In-Line Inspections and In-Line Upgrades; (b) the number of third party "dig-ins" (i.e., damage resulting in repair or replacement of underground facility) to Utility gas assets per 1,000 Underground Service Alert tickets; and (c) the timeliness (measured in minutes) of on-site response to gas emergency service calls.
4. The safety of the Utility's employees is represented by (a) measuring the timely and quality completion of planned action in response to Serious Injuries and Fatalities (SIF), (b) the number of serious preventable motor vehicle incidents that the driver could have reasonably avoided, per one million miles driven, and (c) the percentage of work-related injuries reported to the 24/7 Nurse Report Line within one day of the incident.

Customer

Customer satisfaction and service reliability are measured by:

1. The overall satisfaction (measured as a score of zero to 100) of customers with the products and services offered by the Utility, as measured through a quarterly survey performed by an independent third-party research firm.
2. The total time (measured in minutes) the average customer is without electric power during a given time period.

Financial

Earnings from Operations (shown in millions of dollars) measures PG&E Corporation's earnings power from ongoing core operations. They allow investors to compare the underlying financial performance of the business from one period to another, exclusive of items that management believes do not reflect the normal course of operations (items impacting comparability). Earnings from Operations are not calculated in accordance with GAAP. For a reconciliation of Consolidated Income Available for Common Shareholders as reported in accordance with GAAP to Earnings from Operations, see Exhibit A.

Net benefit from derivative settlement ⁽⁷⁾	~ (0.07)	~ (0.07)
Estimated EPS on an Earnings from Operations Basis ⁽⁸⁾	\$ 3.55	\$ 3.75

All amounts presented in the table above are tax adjusted at PG&E Corporation's statutory tax rate of 40.75 percent except for fines, which are not tax deductible.

- (1) "Items impacting comparability" represent items that management does not consider part of the normal course of operations and affect comparability of financial results between periods. See Exhibit G: Use of Non-GAAP Financial Measures.
- (2) "Pipeline related expenses" includes costs incurred to identify and remove encroachments from transmission pipeline rights-of-way. The pre-tax range of estimated costs is shown below. The offsetting tax impacts for the low and high EPS guidance range are \$51 million and \$33 million, respectively.

(in millions, pre-tax)	2017	
	Low EPS guidance	High EPS guidance
Pipeline related expenses	\$ 125	\$ 80

- (3) "Legal and regulatory related expenses" includes costs incurred in connection with various enforcement, regulatory, and litigation activities regarding natural gas matters and regulatory communications. The pre-tax range of estimated costs is shown below. The offsetting tax impact for the low and high EPS guidance range is \$4 million.

(in millions, pre-tax)	2017	
	Low EPS guidance	High EPS guidance
Legal and regulatory related expenses	~\$ 10	~\$ 10

- (4) "Fines and penalties" includes fines and penalties resulting from various enforcement, regulatory, and litigation activities regarding natural gas matters and regulatory communications. Guidance is consistent with the 2017 components of the \$1.6 billion San Bruno Penalty Decision in the gas transmission pipeline investigations, the disallowances imposed by the CPUC in its final phase two decision in the 2015 GT&S rate case for prohibited *ex parte* communications, and the settlement filed with the CPUC related to the *Order Instituting an Investigation into Compliance with Ex Parte Communication Rules*. Guidance does not include amounts for other potential future fines and penalties. The pre-tax range of estimated costs is shown below. The offsetting tax impact for the low and high EPS guidance range is \$24 million.

(in millions, pre-tax)	2017	
	Low EPS guidance	High EPS guidance
Charge for disallowed expense	\$ 32	\$ 32
GT&S <i>ex parte</i> disallowance	15	15
Ex Parte OII Settlement	~ 13	~ 13
Fines and penalties	~\$ 60	~\$ 60

- (5) "Butte fire related costs, net of insurance" includes recorded legal costs of \$3 million during the three months ended March 31, 2017, associated with the Butte fire, net of insurance. The Utility currently is unable to estimate the low and high end of the range of Butte fire related third-party claims and legal costs for 2017. The offsetting tax impact for the low and high EPS guidance range is \$1 million.

(in millions, pre-tax)	2017	
	Low EPS	High EPS
	guidance	guidance
Butte fire related costs, net of insurance	\$ 3	\$ 3

- (6) "GT&S revenue timing impact" refers to the revenues recorded in excess of the 2017 authorized revenue requirements as a result of the CPUC's final phase two decision issued on December 1, 2016 in the 2015 GT&S rate case. Accounting rules allow the Utility to recognize revenues in a given year only if they will be collected from customers within 24 months of the end of that year. Because the phase one decision directs the Utility to collect the difference between the adopted "interim" revenue requirements and the amounts previously collected in rates, retroactive to January 1, 2015, over a 36-month period, the Utility was not able to complete recording the full true-up of under-collected revenues until the first quarter of 2017. The pre-tax range of the recorded revenues is shown below. The offsetting tax impact for the low and high EPS guidance range is \$62 million.

(in millions, pre-tax)	2017	
	Low EPS	High EPS
	guidance	guidance
GT&S revenue timing impact	\$ (150)	\$ (150)

- (7) "Net benefit from derivative settlement" refers to the settlement to resolve the consolidated shareholder derivative lawsuits and certain additional claims in the San Bruno Fire Derivative Cases filed on March 15, 2017. This amount includes insurance recoveries net of plaintiff costs. PG&E Corporation expects the final approval hearing will be held during the third quarter of 2017. The offsetting tax impact for the low and high EPS guidance range is \$26 million.

(in millions, pre-tax)	2017	
	Low EPS	High EPS
	guidance	guidance
Net benefit from derivative settlement	~\$ (65)	~\$ (65)

- (8) "Earnings from operations" is a non-GAAP financial measure. See Exhibit G: Use of Non-GAAP Financial Measures.

Variable	Description of Change	Estimated 2017 Earnings Impact
Rate base	+/- \$100 million change in allowed rate base	+/- \$5 million
Return on equity (ROE)	+/- 0.1% change in allowed ROE	+/- \$18 million
Share count	+/- 1% change in average shares	+/- \$0.04 per share
Revenues	+/- \$9 million change in at-risk revenue (pre-tax), including Electric Transmission and Gas Transmission and Storage	+/- \$0.01 per share

These general earnings sensitivities on factors that may affect 2017 earnings are forward-looking statements that are based on various assumptions. Actual results may differ materially. For a discussion of the factors that may affect future results, see the Forward-Looking Statements.

PG&E Corporation and Pacific Gas and Electric Company: Use of Non-GAAP Financial Measures

PG&E Corporation discloses historical financial results and provides guidance based on “earnings from operations” in order to provide a measure that allows investors to compare the underlying financial performance of the business from one period to another, exclusive of items impacting comparability.

“Earnings from operations” is a non-GAAP financial measure and is calculated as income available for common shareholders less items impacting comparability. “Items impacting comparability” represent items that management does not consider part of the normal course of operations and affect comparability of financial results between periods, including certain pipeline related expenses, certain legal and regulatory related expenses, fines and penalties, Butte fire related costs, impacts of the 2015 GT&S rate case, and insurance recoveries for natural gas matters. PG&E Corporation uses earnings from operations to understand and compare operating results across reporting periods for various purposes including internal budgeting and forecasting, short- and long-term operating planning, and employee incentive compensation. PG&E Corporation believes that earnings from operations provide additional insight into the underlying trends of the business allowing for a better comparison against historical results and expectations for future performance.

Earnings from operations are not a substitute or alternative for GAAP measures such as consolidated income available for common shareholders and may not be comparable to similarly titled measures used by other companies.
